

Rome Breast Surgery Symposium 2014

Reconstruction and Aesthetic: Obtaining Safety and Results

Rome, 4-5-6 June 2014

HOT TOPICS

Breast Aesthetic Surgery Sessions

- Round vs shaped implants
- The access : Periareolar/IMF vs Axilla
- Textured and Micropolyurethane Implants : myths and reality
- Breast Lipoaugmentation with and without implants
- Rippling and malposition deformities in primary breast augmentation
- Revisional Aesthetic Breast Surgery
- The Inframammary Fold role and management
- Tips and Tricks in implant Explantation
- The ADM role in revisional breast surgery
- Unusual complications
- Concepts and preferences about pedicles and scars in Mastopexy
- Modern approaches to ginecomastia
- Mammoplasties after massive weight loss
- Tuberous breast and other challenging deformities

Breast Reconstruction Sessions

- SSM and NSM morbidity and results of BR methods
- Risk factors for mastectomy flap necrosis and how to manage them
- Treatment proposals in Breast Carcinoma genetically predisposed patients
- Therapeutic Mammoplasty
- One Stage BR : the choice of the right prosthesis
- Experiences with different kind of ADM
- Alloplastic meshes in immediate BR
- ADM/implant based reconstruction and Radiotherapy
- Tips and tricks for two-stage implant BR
- Outcomes of BCS : are they really acceptable ?
- Upper and lower pedicles for partial defects in BCT
- A realistic role and indications of perforators flaps in BCT
- Fat grafting for deformities after BCS
- Reshaping the breast with lipofilling after BR
- Different options for managing the contralateral breast
- The salvage of a complicated BR
- Tips and tricks for DIEP flap BR
- Is there still a place for gluteal or TGF free flaps ?
- Extended LD flap : a realistic alternative to implants ?
- Impact of RT on immediate autologous BR
- Lymphonode free transfer for the oedema management
- BR in the elderly patients
- Adjusting the BR techniques for extremes BMI
